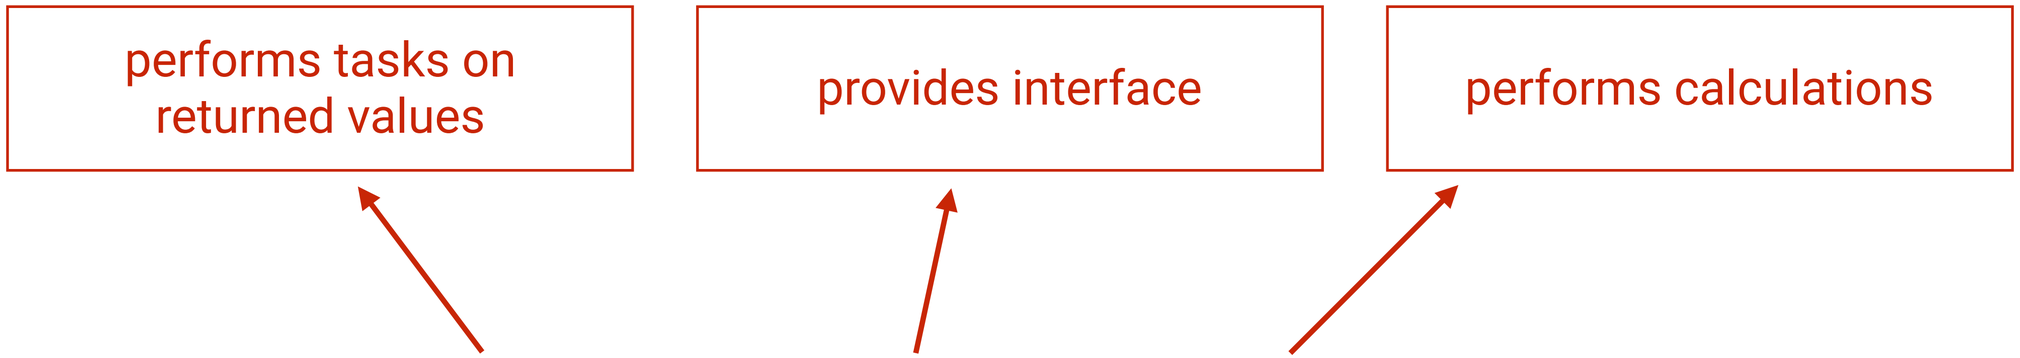
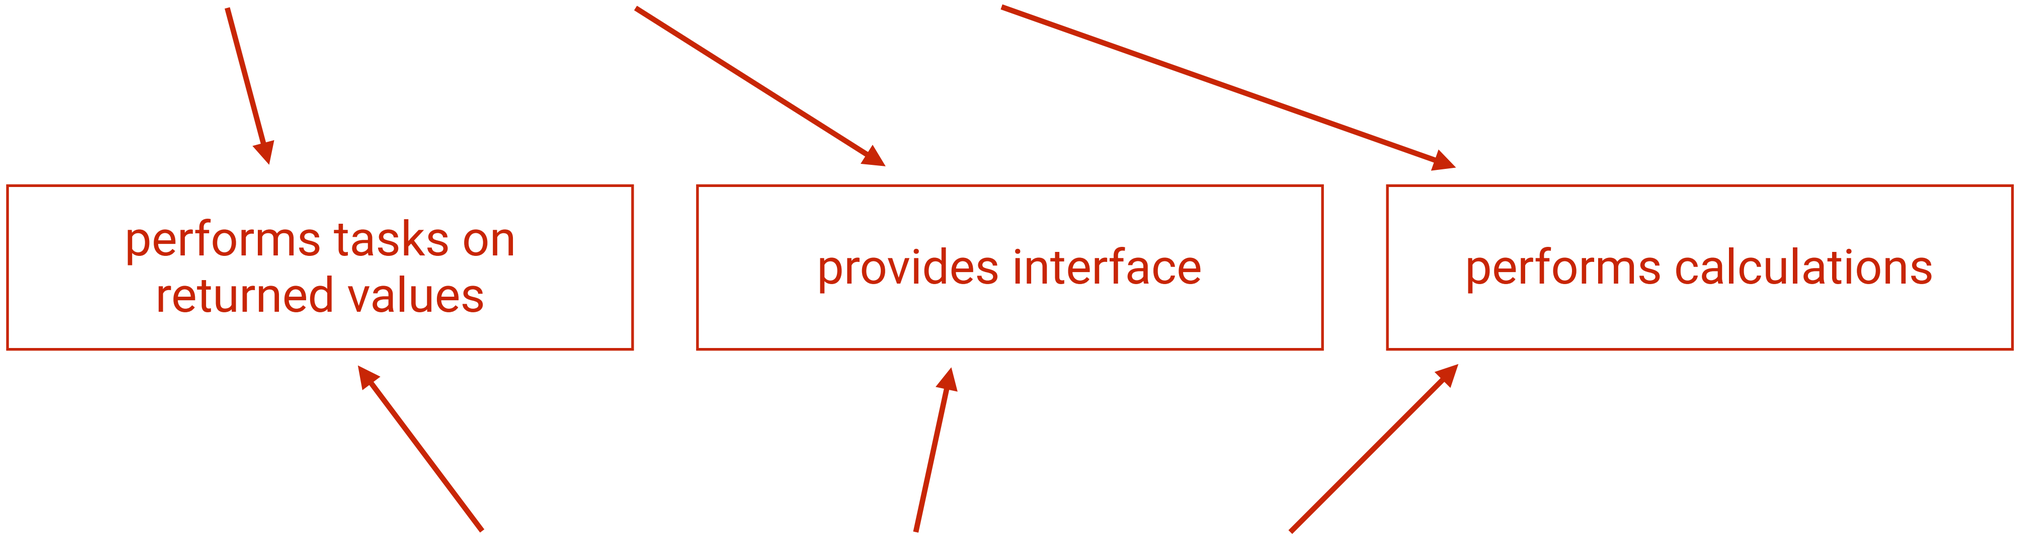
5.Acceptance

well.. ok then



```
results = manage(controller(device(eval_func)))
for result in results:
    # do stuff
```

```
...
system_log = lambda log: logme('syslog', log)
system_log(warning('careful'))
```



```
results = manage(controller(device(eval_func)))
for result in results:
    # do stuff
```
