

```
def counter(val):  
    value = val  
    def count():  
        nonlocal value  
        value += 1  
        return value  
    return inner_function
```

```
>>> c = counter(0)
```

```
>>> c()
```

1

```
>>> c()
```

2

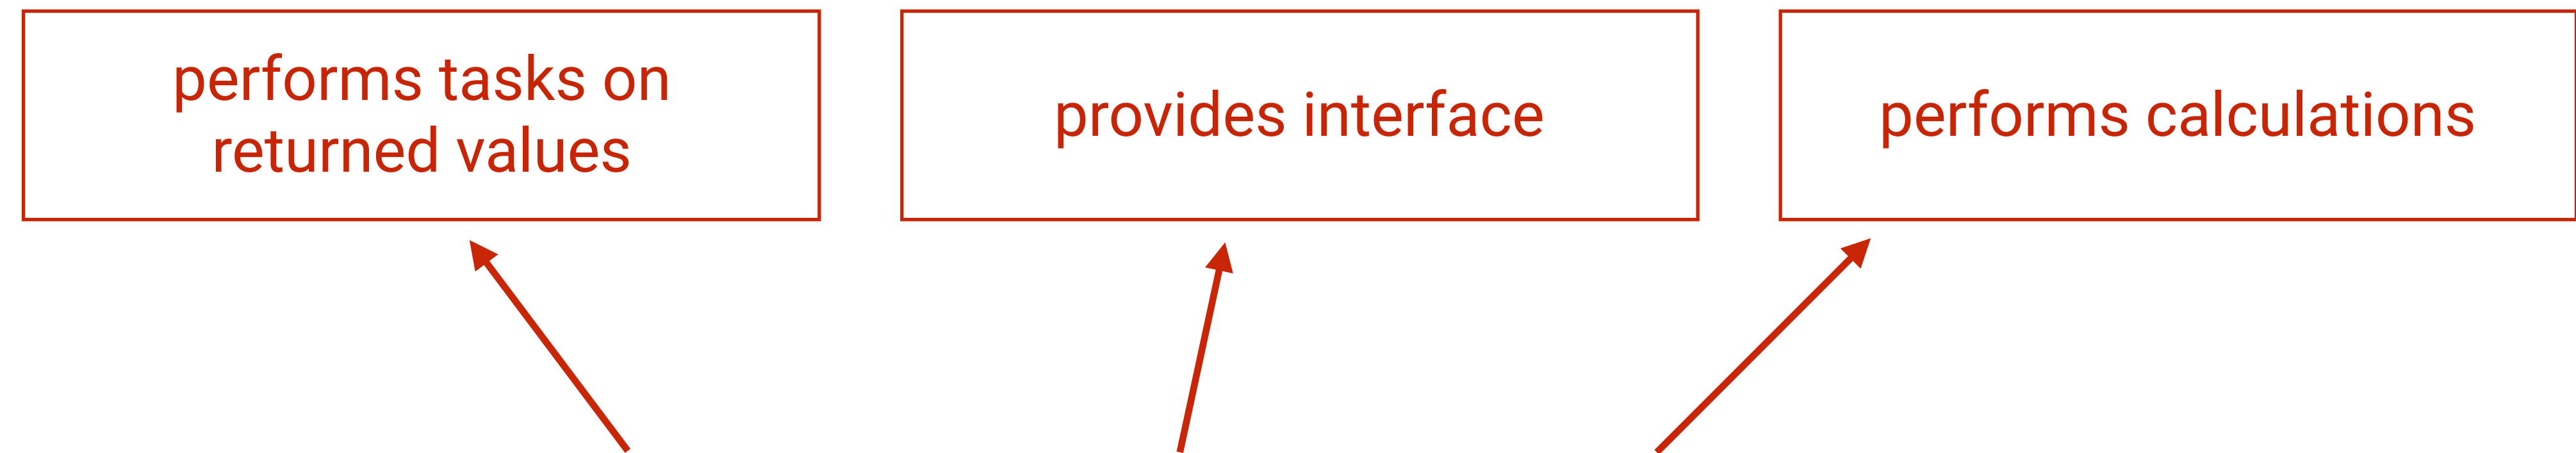

...

This is a sequence!!!

5. Acceptance

well.. ok then

```
results = manage(controller(device(eval_func)))  
for result in results:  
    # do stuff
```
