

2.Anger

```
def log_me(file, msg):  
    print(msg)  
    f = open(...
```

```
logger = lambda logtype: lambda msg: ...  
warning = logger('WARNING')  
system_log = lambda log: logme('syslog', log)
```

```
system_log(warning('careful'))  
# too much lambda!!!
```

2. Anger

```
def log_me(file, msg):  
    print(msg)  
    f = open(...
```

a proper function
definition anyway

```
logger = lambda logtype: lambda msg: ...  
warning = logger('WARNING')  
system_log = lambda log: logme('syslog', log)
```

```
system_log(warning('careful'))  
# too much lambda!!!
```
